Assignment on Regression

[submission deadline: **11:59 pm, 28th August 2021**]

a) Describe a problem related to your organisation where the Multiple regression technique can be applied.

b) Identify Independent and Dependent variables and justify the reasons for selecting them through methods discussed in class.

c) Collect relevant data and establish the regression equation. The sample python codes are provided to you for your easy reference.

d) Show how you can use this equation for prediction as well.
